

BUILDER EDUCATION CLASS

FOCUS FOUR: IS YOUR COMPANY PREPARED?

PRESENTED BY THE HBA OF GREATER SAVANNAH

INSTRUCTOR: MITCHELL SMITH WITH PIKE CONSULTING GROUP

***CURRENT HBA BUILDER MEMBERS WILL RECEIVE 3 HOURS OF CE CREDIT**

OSHA looks for all sorts of hazards on the job site, but these four cause the most injuries and fatalities in the construction industry:

1. Fall protection
2. Electrical work
3. Struck by hazards (trench/excavation, heavy equipment hazards)
4. Caught in between (confined space injuries)

OCTOBER
18

8:45 AM - REGISTRATION

9 AM - 12:00 PM - CLASS

HBA OFFICE

7116 HODGSON MEMORIAL DR

This class is designed for company owners, managers, or any personnel that will conduct field operations. This class explains the four categories of work that cause the largest number of deaths and injuries in construction. The class will discuss these hazards in detail and mitigation techniques as well as new equipment and systems available.

Session facilitator Mitchell Smith, owner of Pike Consulting Group, has been involved in the construction industry for over 17 years. He was a subcontractor in the south metro Atlanta and a finish manager for Meyer-Sutton Homes before forming MLT Contracting, LLC, a custom building company. In more than 20 years' experience as a firefighter, Mitchell has taught numerous safety classes with the fire service and has certified training in high angle rope rescue and rigging techniques as well as many other lifesaving skills. He combined his fire service training with his knowledge of the construction industry to develop this practical and easily understood program that helps builders and subcontractors to become safe and OSHA-compliant.
